1 gal. Liquid Paraffin (24)	if your church uses oil candles, CHECK WITH YOUR CHURCH to see if they can use this oil – the price is a good deal! This oil was recovered from the Candlelight oil candles; the trade name for the oil is Dine-Aglow® Liquid Wax: it is a ‘paraffin lamp oil’ that is advertised as smokeless, odorless, and clean burning; can be used indoors or out with new or old wicks as long as the wicks are made for use in oil candles, torches, or lamps (typically cotton wicks) – not to be used with floating wicks; prices for liquid paraffin are typically \$20 to \$35 per gallon – we are asking for \$10 to simply cover the cost of the chemical-grade plastic jugs that were purchased for the storage of the recovered oil.	\$10	1
